

ABSTRACT

This research aims to determine the influence of Trading Activity Volume, Volatility Index, Covid Growth, and Interest Rate Index on LQ 45 stock performance. The Covid-19 condition has an influence on stock performance in Indonesia. Apart from Covid-19, there are other variables that influence the performance of this stock, such as Trading Activity Volume, Volatility Index, and Interest Rate Index.

The population used in this research is all public companies listed on the LQ 45 Index for the period March 2020 - December 2022 and the sample used was obtained using a saturated sampling technique with a total of 45 companies. The analytical method used is multiple linear regression analysis and processed using the SPSS 25 statistical application.

The results of this research show that trading volume activity, the volatility index, the spread of Covid have a significant effect on the capital market, and the daily interest rate index has a significant effect on the performance of LQ 45 shares.

Keywords: trading volume activity, volatility index, spread of covid, daily interest rate index, and LQ 45 stock performance
