

## **PREFACE**

With immense gratitude to Allah SWT for His blessings and guidance, the author has been able to complete this final project with the title ‘Multilabel Convolutional Neural Network Classification for Cruciate Ligament Injuries’. This project is prepared as part of the requirements for an undergraduate thesis in Department of Statistics, Faculty of Science and Mathematics, Diponegoro University.

The author extends heartfelt thanks to the head of the department, Prof. Dr. Drs. Tarno, M.Si, also to the author’s supervisors, Prof. Dr. Drs. Rukun Santoso, M.Si. and Masithoh Yessi Rochayani S.Si., M.Stat., for their invaluable guidance and contributions, making this work more thorough and insightful. Special thanks are also extended to SMC Telogorejo Hospital Semarang, especially to Yosi Wisnu Wardhana, S.ST., for assisting with the data provided in the project. Many thanks to the lecturers from the department and the author is deeply appreciative of the support from family and friends, whose encouragement no matter how big or small, has been a source of strength. The author welcomes constructive feedback to improve this work and hopes that it will be informative and useful to future readers.
