Using Collaboration as a Governance Strategy : Lessons From Six Watershed Management Programs. *Sage Journals : Administration & Society*, 37(3). <https://doi.org/10.1177/0032321705278000> This article utilizes a comparative cross-case analysis of six watershed programs to examine how collaboration is used to enhance governance of networks where problem-solving capacity is widely dispersed and few organizations accomplish their missions by acting alone. A conceptual framework that illustrates how collaboration occurs at the operational, policy-making, and institutional levels is presented. Understanding these structural relationships is important and can help public managers design
