ABSTRACT	ii
ENDORSEMENT PAGE I.....	v
ENDORSEMENT PAGE II	vi
GUIDELINES FOR USING THE THESIS	vii
ACKNOWLEDGEMENTS	viii
TABLE OF CONTENTS	ix
TABLE OF FIGURES	xiii
TABLE OF TABLES	xiv
ABBREVIATION AND NOTATION	xv
CHAPTER I INTRODUCTION	1
1.1. Background	1
1.2. Problem Statement	4
1.3. Problem Restrictions	5
1.4. Research Objectives	5
1.5. Benefits of the Research.....	5
1.6. Systematics of Writing	6
CHAPTER II	8
LITERATURE REVIEW	8
2.1. Research References.....	8
2.2. Definitions and Basic Concepts	21
2.2.1. Mathematical Modeling.....	21
2.2.2. Dynamical Population	22

2.2.3. Malthus Growth Model	23
2.2.4. The Logistic Equation	24
2.2.5. Lotka-Volterra Predator-Prey Model	32
2.2.6. Environmental Carrying Capacity	37
2.2.7. Allee effect	38
2.2.8. Prey Refugee	39
2.2.9. Nonlinear Incidence Rate	40
2.2.10. Dynamical System	40
2.2.11. Differential Equation System	40
2.2.12. Equilibrium Point and Linearization	41
2.2.13. Stability Analysis and Bifurcation Analysis	42
2.2.14. Dynamical System Portrait (Phase Portrait):	43
2.2.15. Holling Functional Response	45
2.2.16. Epidemiology	45
2.2.17. Endemic	45
2.2.18. Epidemic	45
2.3. Fundamental Theorems	46
CHAPTER III RESEARCH METHODOLOGY	48
3.1. Research Methods	48
3.2. Theoretical Framework and Model	49
3.2.1. Literature Study	49
3.2.2. Developing A Mathematical Model	49
3.2.3. Proving the Model is Well-Posed and Well-behaved	50
3.2.4. Theoretical Analysis	50
3.2.5. Numerical Simulation and Discussion	51
3.2.6. Exploring Other Cases	52
3.2.7. Conclusion	52
CHAPTER IV RESULTS AND DISCUSSION	53
4.1. Building the Mathematical Model	53

4.2.	The Dimensionless Form of the Model.....	55
4.3.	Positivity and Boundedness	56
4.3.1.	Existence and Uniqueness of the Solution for Model A.....	56
4.3.2.	Uniformly Boundedness of Model A	58
4.3.3.	Existence And Uniqueness of the Solution for Model B.....	61
4.3.4.	Uniformly Boundedness of Model B	62
4.4.	Linearization of the System.....	65
4.4.1.	Linearization of Model A	65
4.4.2.	Linearization of Model B	66
4.5.	Equilibrium Analysis.....	67
4.5.1.	Equilibrium Analysis of the Model A.....	67
4.5.2.	Equilibrium Analysis of the Model B.....	70
4.6.	Stability Analysis	74
4.6.1.	Local Stability Analysis of Model A	74
4.6.2.	Local Stability Analysis of Model B	78
4.7.	Extinction Scenarios of the Model A	82
4.8.	Global Stability	87
4.8.1.	Global Stability Analysis of Model A	87
4.8.2.	Global Stability Analysis of Model B	90
4.9.	Bifurcation Analysis.....	92
4.9.1.	Model A Bifurcation Analysis	92
4.9.2.	Model B Bifurcation Analysis	98
4.10.	Numerical Simulation and Discussion	101
CHAPTER V CLOSING.....		116
5.1.	Conclusion.....	116
5.2.	Future Recommendations.....	118
