

## DAFTAR PUSTAKA

- Asrori, A., Susilo, S. H., Witono, K., & Sunu, P. W. (2022). The effect of solar tracker movement on the thermal performance of solar cooker using the Fresnel lens solar concentrator. *Journal of Engineering and Technological Sciences*
- Chen, X., & Yang, X. (2021). Solar collector with asymmetric compound parabolic concentrator for winter energy harvesting and summer overheating reduction: Concept and prototype device. *Energy Conversion and Management*.
- Chen, Z., Han, X., & Ma, Y. (2024). Performance analysis of a novel direct absorption parabolic trough solar collector with combined absorption using MCRT and FVM coupled method. *Applied Thermal Engineering*.
- Goel, A., & Manik, G. (2023). Step towards sustainability: Techno-economic optimization of a parabolic trough solar collector using multi-objective genetic algorithm. *Renewable Energi*.
- Handoyo, E. A., Bisono, I. N., & Jonathan, P. (2020). Perancangan dan pengujian lensa Fresnel pada kolektor surya plat datar. *Jurnal Teknik Mesin*.
- Ibrahim, I. D., Hamam, Y., Alayli, Y., Jamiru, T., & Sadiku, R. (2020). Design and modification of parabolic trough solar collector for performance effectiveness. *Renewable Energy*.
- Liu, X., Bozorg, M. V., Xiong, Q., & Li, W. (2022). Numerical analysis of a new design strategy for parabolic trough solar collectors for improved production and consumption of solar energy in the Belt and Road Initiative countries. *Energy Reports*.

- Mawire, A., Abedigamba, O. P., & Worall, M. (2024). Experimental comparison of a DC PV cooker and a parabolic dish solar cooker under variable solar radiation conditions. *Solar Energi*.
- Mondal, B., & Maji, A. (2025). A brief review on analysis and recent development of parabolic trough collector. *Renewable and Sustainable Energy Reviews*.
- Pourfallah, M., & Languri, E. (2025). Performance optimization of heat transfer in parabolic trough collectors using advanced turbulator designs and nanofluids. *International Journal of Thermal Sciences*.
- Pratama Suwito, A. O., & Darsopuspito, S. (2013). Analisa performa kolektor surya tipe parabolic trough sebagai pengganti sumber pemanas pada generator sistem pendingin difusi absorpsi. *Jurnal Teknik ITS*.
- Rinjani, R. R., Syaifurrahman, S., Wivina, D. I., & Gani, U. A. (2022). Kajian efisiensi panas kolektor pemanas air surya pada mobile mini biodiesel plant. *Jurnal Energi Terbarukan*.
- Robiandi, F., Hidayana, S., Hafid, H., Sastrawan, F. D., Shoodiqin, D. M., & Mayantasari, M. (2022). Rancang bangun kolektor surya tipe parabolic trough menggunakan reflektor aluminium tape–poliester untuk aplikasi pemanas udara pada lemari pengering. *Jurnal Teknik Mesin*.
- Xu, R. J., Zhao, Y. Q., Chen, H., Wu, Q. P., Yang, L. W., & Wang, H. S. (2020). Numerical and experimental investigation of a compound parabolic concentrator-capillary tube solar collector. *Applied Energy*,
