ABSTRACT

The economic growth of D.I Yogyakarta Province tends to increase from 2008-2020, meanwhile there are still many districts/cities' economic growth in D.I Yogyakarta that are still coming in bellow average of D.I Yogyakarta Province's economic growth. differences in economic growth that show income inequality. Income inequality between regions can lead to development problems and economic instability.

This study aims to analyze the magnitude of income inequality between regions and classify the leading regions in D.I Yogyakarta Province. The analytical methods used are Williamson index analysis, Klassen typology, Location Quotient (LQ) analysis.

The results showed that there are still many areas in Yogyakarta Province which are classified as relatively underdeveloped areas (quadrant IV). The income disparity between regions in Province DIY in 2008-2020 is high (>0.5).

Keywords: Income inequality, economic growth, D.I. Yogyakarta , Location Quotient (LQ)
