## ABSTRACT

Keraton Kasunanan Surakarta is one of the historical and cultural destinations located in Solo City, Central Java. The development of Keraton Kasunanan Surakarta began in 1745 after the *Geger Pecinan* event that occurred in 1743. In its development, Keraton Kasunanan Surakarta converted some of its buildings into Museum Keraton Surakarta on the initiative of Kanjeng Gusti Pangeran Haryo (K.G.P.H) Panembahan Djatikusumo. Museum Keraton Surakarta is one of the destinations that is quite visited by foreign tourists because of its high historical and cultural value. However, many tour guides at the Museum Keraton Surakarta have not mastered English well in communicating with foreign tourists. Therefore, this study aims to explain the importance of English and Indonesian guidance book for tour guide and explain the process of making the guidance book itself. This research uses the Research and Development (R&D) method by Sugiyono (2013) which has 10 steps. However, in this study only 8 steps of the 10 steps were used such as potential and problem analysis, data collection, product design, design validation, design revision, product testing, product revision, and production. This research only uses 8 steps because this product is not mass-produced. In the designing process, this guidance book uses data collection methods such as observation, interview, documentation, and literature study. The result of this research is a guidance book equipped with a QR Code containing audio and a list of Javanese word equivalents into English. This guidance book was then printed and will handed over to the Keraton Kasunanan Surakarta so that it could be used as teaching material for tour guides.
