

CHAPTER VII. CONCLUSION AND RECOMMENDATIONS

1) Conclusion

Based on the findings of this research, it is factual to conclude that there is a significant relationship between stages at diagnosis and the incidences of death, and the stages at diagnosis determined survivorship of the patients diagnosed in Kigali city between 2014 and 2018 at 1-, 3- and 5-years post diagnosis. The early diagnosis, the better the treatment outcomes.

2) Recommendations

In reference to the results of this study, it is logical to recommend a regular awareness and screening of stomach cancer and encourages Kigali residents to seek medical consultation services earlier for better clinical outcomes.
