Dear Aris Triwiyatno

Welcome to **Iranian Journal of Fuzzy Systems** website.

Thank you for your registration in the Editorial System Online Subbmission and peer review tracking system. Here is your username and confidential password, which you need to access the system at :

http://ijfs.usb.ac.ir/

Your username is: **aristriwiyatno**

Your password is: **14132249**

Please save this information in a safe place.

Your can change your password and other personal information by loging in at http://ijfs.usb.ac.ir/ and choosing "Change Password" from the menu bar .

Yours sincerely,

Journal Manager

Iranian Journal of Fuzzy Systems

Manuscript ID: 2080-IJFS   Manuscript Title: **Robust fuzzy control design using genetic algorithm optimization approach: case study of spark ignition engine torque control**   Authors: Aris Triwiyatno, S. Sumardi, Esa Apriaskar   Dear Prof. **Dr. Aris Triwiyatno**

  I wish to acknowledge receiving the above-mentioned manuscript.   It should be noted that the manuscript will be reviewed for possible publication in Iranian Journal of Fuzzy Systems.   Please be sure that the submitted manuscript has not been published previously and will not be submitted elsewhere prior to our decision, in order not being considered as a plagiarism action.   Our editorial decision will be brought to your attention once the paper has been reviewed due to the referees' consideration.   I wish to take this opportunity to thank you for sharing your work with us.

Yours sincerely,

Managing Editor of **Iranian Journal of Fuzzy Systems**
R. A. Borzooei

Dear Prof. **Dr. Aris Triwiyatno**

We have reviewed your paper. Based on the results of the reviews of our reviewers, your paper is included in the scope of our journal and can continue the process of revision. There are some substance revisions that must be made for your paper. Here is a list of repairs that you have to do.

1st reviewer:
1- Please declare of your novelty based on fuzzy system improvement
2- Check another references or research that have similar idea in robust fuzzy. What's the difference?
3 - Please give more analytic results than graphical results only.
Recommendation: Accepted with major revision

2nd reviewer:
1- You don't need to explore SIE model deeply, since the model only to prove your method.
2- Please give more result analysis to prove your method, since using GA give us more complex calculation.
3 - Gain of every operating condition must be stated in a table and show how to calculate them.
4. The flowchart must be in English.
Recommendation: Accepted with major revision

3rd reviewer:
1- Please use references in 10 years publications recently.
2- Make a comparasion with another controller method.
Recommendation: Accepted with minor revision

Truly yours

M. Mashinchi
Editor-in-Chief IJFS

Dear Prof. M. Mashinchi,

At first, many thanks for accepting our paper in your journal.
According to reviewer corrections, here are our paper revision Paper No. 2080-IJFS (R1) for Iranian Journal of Fuzzy System.

Yours sincerely,

Aris Triwiyatno

Respond to reviewer comments:

Reviewer	Comments	Respond	Page (in paper)
1st reviewer	Please declare of your novelty based on fuzzy system improvement.	The novelty of this research is providing a method to repair control action discontinuing over transient state behavior (*of system with transient state changes rapidly as spark ignition engine*) by developing an iterative based optimization programming as genetic algorithm (GA) method to produce more accurate gains appropriate to gains that calculate using LQIT optimal control design.	Page 2
	Check another references or research that have similar idea in robust fuzzy. What's the difference?	Some literatures (related to robust fuzzy method) reviews have been added in Introduction section.	Page 2
	Please give more analytic results than graphical results only.	Some analytic results have been added in Result and Discussion section.	Page 12
2nd reviewer	You don't need to explore SIE model deeply, since the model only to prove your method.	Some theory of SIE model has excluded.	Page 5-7
	Please give more result analysis to prove your method, since using GA give us	Some analytic results have been added in Result and Discussion section.	Page 12

Reviewer	Comments	Respond	Page (in paper)
	more complex calculation.		
	Gain of every operating condition must be stated in a table and show how to calculate them.	A table of operating condition gain has been added.	Page 4-5
	The flowchart must be in English.	Repaired.	Page 4
3rd reviewer	Please use references in 10 years publications recently.	Most of references use some publications in 10 years recently.	Page 14
	Make a comparison with another controller method.	A comparison method has been added (Linear Quadratic Integral Tracking – LQIT Control Method).	Page 12

Manuscript ID: 2080-IJFS (R1)   Manuscript Title: **Robust fuzzy control design using genetic algorithm optimization approach: case study of spark ignition engine torque control** Authors: Aris Triwiyatno, S. Sumardi, Esa Apriaskar Date: 2014-11-28   Dear Prof. **Dr. Aris Triwiyatno**   Thank you for submitting the revised file of your manuscript to the **Iranian Journal of Fuzzy Systems** The Editorial Office will proceed on your manuscript and inform you in the earliest time.   If there is anything else, please do not hesitate to contact us.   Yours sincerely Managing Editor of **Iranian Journal of Fuzzy Systems** R. A. Borzooei

Dear Prof. F. Montazerifar and Prof. R. A. Borzooei,
Managing Directors of IJFS

According to your last review of our paper in Latex, here are our corrected paper in one folder that support Latex system (tex, dvi, pdf, jpg, etc.).

Actually we do not know what did you mean about the first review, as: "The PDF file is not running", because we can open that pdf file in Acrobat Reader properly. We used MikTeX 2.9 to convert tex file to pdf file (plug-in feature to WinShell 3.2 in pdfLatex program calls).
Could you give us another solution?

Yours Sincerely

Dear Prof. F. Montazerifar and Prof. R. A. Borzooei, Managing Directors of IJFS

According to your last review of our paper in Latex, here are our corrected paper in one folder that support Latex system (tex, dvi, pdf, jpg, etc.).

Actually we do not know what did you mean about the first review, as: "The PDF file is not running", because we can open that pdf file in Acrobat Reader properly. We used MikTeX 2.9 to convert tex file to pdf file (plug-in feature to WinShell 3.2 in pdfLatex program calls).
Could you give us another solution?

Yours Sincerely
