

ABSTRACT

This research analyzes the effect of inflation and minimum wages on employment opportunities in: (1) in large and medium industries in Depok City, (2) the processing industry sector, (3) inflation, minimum wages and (4) opportunities. Work (Employment Opportunities). The data used is a table of Inflation, Minimum Wage and Job Opportunities in the Large and Medium Processing industry sector in Depok City for 2009-2022.

Data analysis uses multiple linear regression models with the eviews12 application. The results of the analysis show: (1) A high inflation rate will result in investment failure to provide job opportunities and vice versa (2) Minimum wage increases are influenced by pressure from local workers and the strength of regional trade unions, meaning that minimum wage increases are not only implemented by policy makers but also the whole elements (3) Low inflation levels cause high cholesterol, meaning that increasing aggregate demand will affect the low job opportunities created (4) Inflation variables have a positive and significant effect on job opportunities in large and medium processing industries in Depok City in 2009-2022 with standardized coefficient values amounting to 98.74829, which means that a 1 percent increase in inflation will cause an increase in employment opportunities of 98.74829. From the test results it is proven that inflation has a significant influence on Job Opportunities with a significance level of $0.0074 < \alpha = 0.05$ (5) The Minimum Wage variable has a positive effect on Job Opportunities with a standardized coefficient value of 0.167877, which means a 1 percent increase in Wages The minimum will cause an increase in Job Opportunities of 0.167877. From the test results it is proven that the Minimum Wage has a significant influence on Job Opportunities with a significance level of $0.000 < \alpha = 0.05$.

It can be concluded that inflation has a positive and significant effect on Job Opportunities and Minimum Wage has a positive and significant effect on Job Opportunities. Therefore, the government needs to pay more attention to the issue of inflation, minimum wages and job opportunities in the Manufacturing Industry Sector both in terms of policy, cooperation with the private sector to increase investment in worker employment, as well as calculating minimum wage requirements and suppressing inflation appropriately so that demand and production needs are in line with and effective.
