ACKNOWLEDGEMENT

Praise to God Almighty for always bestowing His Grace and wisdom in every step of this research, enabling it to be completed on time. This report was compiled as a result of a study for the Telecommunication Glossary Ministry Communication and Digital Republic of Indonesia.

This Final Project is a form of responsibility for researches to complete an applied bachelor degree. On this occasion, the researcher expressed his gratitude to the parties who participated in assisting and guiding the research during the preparation of the final project report. Gratitude researches given to:

1. Windy Harsiwi, S.Pd., M.Int.Cul. as a supervisor who always guides researches in completing the final project,
2. Sriwahyu Istana Trahutami, S.S., M.Hum. as Head of Applied Foreign Language Study Program,
3. Prof. Dr. Ir. Budiyo, M.Si. as Dekan of the Vocational College of Diponegoro University,
4. Beloved family, Bapak, Mama, Abang Wellman. Adik Alrius and the whole big family, who support in completing the final project,
5. All of International Affairs Staff from Ministry of Communication and Digital, for giving me the chance to do research and for giving me access to materials that helped a lot with the development of the bilingual booklet,
6. Special thanks to Hensel, Deandra, and Patokan Kenzo Matic, who always encouraging me, keeping me positive, and making me happy during the final stages of this project,
7. My partner Tarishah Salwa Sha'vana and Fitra Aulia, who always support and motivate each other to complete this research together until the end.

8. To my friends from junior high school, Maria, Anindita, Angel, and Sawo Based, who helped the researcher during the making of the final project and support me,
9. Also thanks to Lee Minhyung and Lee Donghyeok, who helped me in times of trouble and always helped me to be happy and put God first.

I hope this final assignment can be a good reference for readers. I realize that there is a lot of weaknesses in this research report, so any criticism, ideas, and suggestions are highly appreciated.

ABSTRACT

In the era of globalization and technological advancement, the demand for accurate and consistent translation of technical documents is increasing, particularly in the telecommunications sector. The Ministry of Communication and Digital Affairs of the Republic of Indonesia had not established a standardized glossary to support the translation of official documents. Therefore, this research aimed to develop a bilingual the telecommunication glossary as a translation aid for ministry translators and staff. This study applied the Research and Development (R&D) method based on the Borg & Gall model, adapted into seven stages: data collection, planning, preliminary product development, revision, field testing, final revision, and dissemination. Data were obtained through semi-structured interviews, literature review, and document analysis from both the ministry and international institutions such as ITU. The resulting product was a bilingual Indonesian-English glossary containing 75 key technical terms in telecommunications development, featuring definitions, sample sentences, and user-friendly visual formatting. The field testing indicated that the product was validated by both content and media experts and received positive feedback from target users. The glossary was proven to improve translation accuracy and consistency in official documents. Thus, it is expected to serve as a standardized reference that supports national and international terminology harmonization and strengthens Indonesia's role in global technical diplomacy.

Keywords: Glossary, Telecommunication, Technical Translation, Glossary, Borg & Gall, Ministry of Communication and Digital Affairs Republic of Indonesia.

ABSTRAK

Pada era globalisasi dan kemajuan teknologi informasi, kebutuhan akan terjemahan dokumen teknis yang akurat dan konsisten semakin meningkat, terutama dalam sektor telekomunikasi. Kementerian Komunikasi dan Digital Republik Indonesia belum memiliki pedoman terminologi baku yang mendukung penerjemahan dokumen resmi. Oleh karena itu, penelitian ini dilakukan untuk mengembangkan sebuah buku saku glosarium telekomunikasi dwibahasa sebagai alat bantu penerjemahan teknis yang dapat digunakan oleh staf dan penerjemah kementerian. Penelitian ini menggunakan metode Research and Development (R&D) model Borg & Gall yang disesuaikan menjadi tujuh tahapan, meliputi pengumpulan data, perencanaan, pengembangan produk awal, revisi, pengujian lapangan, revisi akhir, dan diseminasi. Data dikumpulkan melalui wawancara semi-terstruktur, studi pustaka, dan analisis dokumen resmi kementerian serta lembaga internasional seperti ITU. Produk yang dikembangkan berupa glosarium dwibahasa Indonesia-Inggris yang memuat 75 istilah teknis utama dalam bidang pengembangan telekomunikasi, lengkap dengan definisi, contoh kalimat, dan format visual yang menarik. Hasil pengujian menunjukkan bahwa produk ini dinilai layak oleh para ahli materi dan media, serta diterima positif oleh pengguna sasaran. Glosarium ini terbukti mampu meningkatkan konsistensi dan akurasi penerjemahan dokumen teknis kementerian. Dengan demikian, produk ini diharapkan menjadi referensi standar yang mendukung harmonisasi terminologi nasional dan internasional, sekaligus memperkuat posisi Indonesia dalam forum diplomasi teknis global.

CHAPTER I

INTRODUCTION

1.1 Research Background

The rapid development of Information and Communication Technology (ICT) in the digital era has brought fundamental changes to various aspects of human life. Telecommunications play a crucial and strategic role in supporting societal activities, both at the individual and institutional levels. This technology offers significant opportunities, including easier access to global information, enhanced online learning, business expansion, and strengthened social connections across regions. However, not all segments of society have equal access to this technology, leading to a disparity known as the digital divide (Andrew, 2011). Within the context of national development, ICT is not only a necessity but also a strategic instrument that contributes to improving the quality of education, fostering economic growth, and advancing the telecommunications and informatics industries in Indonesia.

The telecommunications sector holds a highly strategic position in the broad distribution of information to the public. Its role extends beyond facilitating communication; it also serves as a driver of national economic growth. According to data from the International Telecommunication Union (ITU), every 1% increase in teledensity has the potential to boost national economic growth by up to 3%. This research highlights that investments and advancements in telecommunications have a significant impact on social aspects and serve as a catalyst for sustainable
