

PREFACE

Praise be to Allah SWT, who has granted His blessing and guidance so that the author can complete the Final Project proposal with the title Hematological Profile In Sprague-Dawley Rats (*Rattus Norvegicus*) After Shape Discrimination Treatment. This study proposal was created as part of the requirements for conducting final undergraduate (S1) research at the Department of Biology, Faculty of Science and Mathematics, Diponegoro University Semarang.

This study attempted aims to analyze the effect of the shape discrimination related to the formed elements of the blood parameters. It is envisaged that this research will help scientists to know the hematological profile after shape discrimination test and to become a reference material for future research.

The author recognizes that this idea is far from impeccable, author sincerely hopes for feedback in the form of constructive remarks and suggestions from all parties so that it may be used for future improvements.
