ABSTRACT

This research discusses the effect of giving reward to the utilization of collections in the Library of Islamic School Hidayatullah Semarang. The purpose of this research is to know whether there is an influence between giving reward to the utilization of collections in the Library of Islamic SMA Hidayatullah Semarang or no effect. The method used in this study is quantitatively descriptive by using a sample of 89 respondents obtained using the purposive sampling method. Data analysis in this study uses descriptive analysis and inferential statistical analysis. The results showed that there was a link between the awarding of the collection of collections in the Library of Islamic SMA Hidayatullah Semarang. The hypothesis test was conducted by analyzing the results of the Pearson Product-Moment correlation coefficient between the rewarded variable and the collection utilization variable. The result obtained a significance value of 0.000 with a very strong positive relationship rate of 0.706. The H0 rejection criterion is if it is a significant value of α < 0.05, so H1 is accepted and H0 is rejected because it is obtained a significance value that is smaller than 0.05. It can be concluded that the awarding of the reward affects the utilization of collections in Islamic School library Hidayatullah Semarang.
