

## **ABSTRACT**

*This research discusses about "analysis of library materials censoring process in the selection of fiction collections in the Library of SMP Negeri 21 Semarang". The purpose of this research is want to know about how library materials censoring process in the selection of fiction collections in the Library of SMP Negeri 21 Semarang. The research design used in this research is qualitative research with the descriptive type. Data collection method used are observation, documentation and interview with informants determined by purposive sampling method. The results of this research is based on the library material censoring process, especially in the fiction collections in the Library of SMP Negeri 21 Semarang. The fiction collections censoring process is done through several previous stages, there are the collections procurement, fiction collections selection and then censoring to the fiction collections. The fiction collection censorship in the Library of SMP Negeri 21 Semarang shows that the fiction collections are less suitable for the school environment with the presence of collections that have inappropriate pictures and sentences for the teenagers.*
